

ATTA ULLAH TARIQ

Senior Full-Stack PHP Developer (CodeIgniter, Laravel) & DevOps Engineer

attaatariq@gmail.com | +92 (333) 665 8622 | Islamabad, Pakistan | [attaatariq.github.io](https://github.com/attaatariq)

PROFESSIONAL SUMMARY

Software Engineer with 8+ years of experience designing, building, deploying, and operating enterprise-grade software systems across government, fintech, SaaS, logistics, accessibility, e-commerce, education, healthcare, and digital transformation domains. My expertise spans full-stack development, backend architecture, API engineering, and production infrastructure, with a strong focus on scalable web, mobile, desktop, and API-driven systems. Core expertise includes PHP-based ecosystems, modern JavaScript technologies, relational and NoSQL databases, Redis for caching and queueing, and event-driven backend architectures. Experienced in designing enterprise applications, multi-tenant SaaS platforms, MVPs, workflow automation systems, fintech integrations, accessibility-compliant solutions, and large-scale government platforms, covering both greenfield development and legacy system modernization. Proficient in implementing secure and high-performance architectures using REST APIs, GraphQL, OAuth 2.0, JWT-based authentication, asynchronous processing, and third-party integrations. Strong understanding of system design principles with emphasis on scalability, modularity, clean architecture, and SOLID practices, ensuring maintainable and production-ready solutions. Infrastructure and DevOps experience includes Linux-based production environments using LAMP/LEMP stacks, CI/CD automation with GitHub Actions, containerization using Docker (multi-stage builds, image optimization, and compose), and cloud deployment on AWS (EC2, S3, IAM) with practical project-based implementation. Experienced in application security hardening, deployment pipelines, and production monitoring. Involved in end-to-end delivery lifecycle ownership from requirements analysis and architecture design to deployment, optimization, and operational support. Recently expanded into integrating AI-powered solutions using OpenAI and LLM technologies to enable intelligent automation and business process enhancement. Involved in end-to-end delivery lifecycle ownership from requirements analysis and architecture design through to deployment, performance optimization, and operational support. Integrates AI-powered solutions using OpenAI and LLM technologies to enable intelligent automation and business process enhancement.

CORE SKILLS & TECHNOLOGIES

PHP (Core PHP) | JavaScript (ES6+) | TypeScript | SQL | HTML5 | CSS3 | Bootstrap | jQuery | AJAX | CodeIgniter | Laravel | CakePHP | WordPress | Mezzio | Laminas | REST APIs | GraphQL | Webhooks | API Architecture | Third-Party API Integrations | OAuth 2.0 | OpenID Connect (OIDC) | JWT Authentication | RBAC | Service-Oriented Architecture | Multi-Tenant Systems | Event-Driven Systems | MySQL | MariaDB | PostgreSQL | Microsoft SQL Server | MongoDB | Firebase | Redis | Bull Queue | Linux | Bash Scripting | Nginx | LAMP/LEMP Stack | Docker (containerization, Compose, multi-stage builds) | AWS (EC2, S3, IAM) | CI/CD Pipelines | GitHub Actions | SSL/TLS | SSH Hardening | VPS & Dedicated Servers | OpenAI API Integration | LLM Integrations | Prompt Engineering | AI Workflow Automation | Node.js | NestJS | FastAPI | React | Next.js | AngularJS | ElectronJS | Flutter | Stripe | PayPal | PayFort (Amazon Payment Services) | PayFast | Apple Pay | Google Pay | Checkout.com | EasyPaisa | JazzCash | Plaid | Bond/Atelio | Salesforce API Integrations | Firebase Cloud Messaging | OneSignal | WhatsApp Business API | SMS Gateway Integrations (Zong, Telenor) | WCAG 2.1 | ADA Compliance | Honeybadger | Git | GitHub | GitLab | Bitbucket | Postman | Cursor IDE | Claude API | Figma | Adobe Photoshop

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer (CodeIgniter, Laravel) | IKONIC Dev Pvt Ltd, Islamabad

Jan 2024 – Present

- Led development of SaaS, fintech, and accessibility modules using CodeIgniter, Laravel, CakePHP, WordPress, NestJS, Next.js.
- Designed a scalable async processing architecture using Redis and Bull Queue for background job execution, and built a WCAG 2.1 accessibility automation engine using Puppeteer and axe-core for automated compliance scanning and reporting.
- Integrated Stripe, Google Pay, Apple Pay, S3 bucket, Salesforce APIs, Plaid, Bond/Atelio, and Honeybadger for billing, storage, third-party integrations, and error monitoring across enterprise systems.
- Contributed to multi-repository enterprise ecosystem (admin portals, user portals, widgets, APIs) with focus on modular architecture, maintainability, Docker-based deployments, daily ticket handling, and improved production reliability through enhanced monitoring and error tracking.

Senior Backend Developer | Sigma Digital Solutions / SpiralClicks, Islamabad

Sep 2021 – Dec 2023

- Built and maintained multi-country SaaS and event management platforms using PHP, CodeIgniter, Laravel, and AngularJS.
- Developed and enhanced APIs for mobile applications, CMS systems, and large-scale event workflows under AMC, collaborating with mobile app teams for integration support and UAE teams for daily project management processes.
- Engineered and delivered end-to-end race-day and real-time event processing system, taking the Raceday application from problem definition to production-ready deployment with live operational workflows and role-based controls.
- Worked across aviation, events, and membership platforms to improve scalability, stability, and performance through continuous bug fixing, backend optimization, and system enhancements in production environments.

Senior Web Developer | Ahbab Solutions Pvt Ltd, Islamabad

May 2019 – Aug 2021

- Led full-stack development of e-commerce, logistics, marketplace, and OOH mobile marketing platforms using CodeIgniter and Core PHP, implementing multi-tenant and multilingual architectures for global-scale operations.
- Collaborated on mobile-integrated systems for Android and iOS, supporting APIs, localization, and real-time tracking features while working with business and mobile teams and engaging with clients and marketplaces.
- Delivered end-to-end systems for inventory, laboratory management, advertising, and real estate platforms, integrating third-party services such as Google Maps APIs and translation services for scalable global applications.

Web Application Developer | Creatrix Solutions, Islamabad

Oct 2018 – Mar 2019

- Developed backend APIs and dashboards for mobile-first platforms including in-game campaign management, smart bicycle-sharing (CYKIQ), and healthcare job marketplace systems (WorQR) using Core PHP, CodeIgniter, and Laravel.
- Delivered and maintained scalable backend systems supporting real-time operations, user workflows, scheduling, and campaign management with MySQL-based architectures and frontend integrations (Bootstrap, JavaScript, jQuery).

Web Developer & Digital Solutions Associate | Intellectual Works, Lahore

Oct 2017 – Sep 2018

- Developed SEO-driven web platforms, CMS systems, and business management solutions using PHP and WordPress.
- Built automation tools for content extraction and Chrome extensions, and implemented SEO optimization strategies.

INDEPENDENT PROJECTS

Management Information System, Workers Welfare Fund

A national-scale digital transformation platform modernizing workers welfare fund (WWF) operations across Pakistan.

- Developed a multi-platform ecosystem (web, mobile, desktop, and RESTful APIs) integrating NADRA services, biometric verification, AI-driven automation (OpenAI), identity-based tracking, and role-based access control (RBAC).
- Engineered end-to-end business processes covering worker and company onboarding, verification, grants and benefits management, application processing and marking, case management, financial operations, reporting, audit trails, and administrative systems, while managing infrastructure, Linux servers, and CI/CD-driven deployments.

Sell Point, Classified Marketplace & Subscription Platform

A classified marketplace platform for buying and selling goods, initially launched in Pakistan with ongoing market expansion.

- Led full-stack development of the platform using Laravel, including mobile APIs, integrating payment gateways (PayPal, PayFast), messaging systems (Zong SMS, WhatsApp APIs), Firebase notifications, and social authentication, and designed subscription and monetization flows with secure authentication and campaign automation.
- Deployed and managed applications on AWS infrastructure across multiple instances, handling environment setup, scaling, monitoring, and ongoing maintenance to ensure high availability, reliability, and performance.

EDUCATION

Master of Science in Information Technology (MSIT)

2019 – 2021

National University of Sciences & Technology (NUST), Islamabad, Pakistan

Coursework Completed

Bachelor of Science in Information Technology (BSIT)

2013 – 2017

The Islamia University of Bahawalpur (IUB), Bahawalpur, Pakistan

CGPA: 3.13 (B Grade)
